Flywheel

A Rolling Mill Fly Wheels is heavy metal Rolling Mill Fly Wheels attached to a drive shaft, having most of its weight concentrated at the circumference. Main function of flywheel is to reduce speed fluctuation by storing extra energy during part load as kinetic energy and same is released during overloading.

By slowly increasing the speed of a flywheel a small motor can store up energy which enables the motor to perform a function for which it is ordinarily too small.

Special Features of Fly Wheels:

- Statically, Dynamically & Mechanically Balanced
- Ultrasonic Tested
- Fully machined & bored on VTL upto Zero oddness
- All Sizes within the Blasting Range of the Material
- Genuine and Branded Heavy Duty Antifriction Spherical Roller Bearings are installed
- Flywheel is designed taking into account maximum possible energy fluctuation encountered in-service.

Pinch Rolling Machine

Our company is involved in the manufacture, retail and supply of **Pinch Rolling Machine**, which can be availed in different specifications to meet varied clients' needs. Manufactured in accordance with the predefined industry guidelines, these sturdily constructed rolls are extensively appreciated in the industry. Offered range of pinch rolls is tested for its flawlessness, before handing over to the patrons.

Features:

- Durable
- Easy to operate
- Rugged in construction

Technical Specifications:

- Base frame: 5"channel
- Stand: 100 mm slap fabricated
- Gear box material steel fabricated
- Gear material: E.N-9 forging
- Roll material: E.N-9 forging
- Motor capacity: 25H.P

Shearing Machines

We offer Cold Shear Cutting Machine, Rotary Shearing Machine, Rotary Flying Shearing Machine and Billet Shearing Machines from India.

Cold Shear Cutting Machine

We are one of the preferred choices of our customers, for manufacturing, retailing and supplying **Cold Shear Cutting Machine** that is specifically designed and engineered by our experts. Manufactured in adherence to the set industry standards, these efficient and sturdily constructed machines are massively applauded for their exceptional performance

Features:

- Constant performance
- Longer service life
- Low maintenance required

Technical Specifications:

- Cutting capacity 8 mm to 25 mm (Hot)
- Size range 300 mm to 500 mm PCD
- Light & compact, hence easy place able / shift able

Rotary Shearing Machine

Being one of the pre-eminent names of the business, we are involved in manufacturing, supplying and retailing **Rotary Shearing Machine** that is provided in different specifications. Ruggedly constructed and durable, these efficient and supreme functionality machines are extensively demanded among our precious patrons. To avoid damages, we offer the series in safe packaging.

Features:

- Tough in construction
- Longer functional life
- Requires less maintenance

Specifications:

- Cutting capacity 8mm to 32 mm
- Blade material is tank plate
- Big cylinder 100 to 450
- Small cylinder 65 to 150
- Available in center 350 mm to 550 mm
